23.   Problem: (use additional Sheets if necessary)
An ECS Verifcation Report (EVR) is submitted verifying Criteria 1108. EVRs are inserted into the VDB as a test type, and VDB test definition is under CCB control. The EVR "test" cannot be statused in the VDB until the EVR is recorded as a test within the VDB.

24. Proposed Solution: (use additional sheets if necessary)
Add test "V1108" to the VDB. The parameters for the test definition related to this EVR are documented on the EVR form (attached). Once the EVR is in the VDB, the appropriate status information can be added.

25. Alternate Solution: (use additional sheets if necessary)
None.

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
Criteria 1108 cannot be labeled as 'verified.' VDB will not reflect ECS-completed testing.
